

GALLOP

Result Driven

Gallop is focused on helping customers reduce cost, improve ROI and deliver value with IT enterprise solutions. Gallop is a value-added reseller for HP SW and full service partner for ALM (legacy Mercury) space providing level 1 support to customers. Gallop's R&D is engaged in extending HP software's ALM solutions and building customized solutions for our customers.

We specialize in accelerated Test Asset Modernization (TAM) utilizing innovative technologies such as WinQuick and RoboQuick. Our Virtual CoE offering is helping customers realize the value of a custom built shared services organization, without incurring the cost and maintenance overheads.

Our expertise in ALM space and the passion in bringing customer delight make the company a dominant player in the enterprise software quality and development markets. Gallop has 100% reference customer base and **we are proven to be Result Driven.**

Gallop's Strategic Staffing Services arm provides IT staffing specializing in applications, infrastructure, security, testing and network in all industry verticals. Gallop's off-shore arm based in India provides cost effective extension to Project teams and delivers 24x7 throughput in project implementations.
